

Anti-boarding – Quick Removable Razor Wire

Quick removable razor wire is ideally placed at vessel locations where the razor wire requires quick deployment or removal, e.g. lifeboat or life raft stations, pilot entry location or manifolds. The system is suitable for fishing vessels where the wire can be deployed during operation when needed immediately.

The system deployed. Each capsule is equipped with 10 meters of razor wire

This model is designed for merchant vessels. Quick removable razor wire replaces the conventional razor wire barriers. Save time during an emergency retracting the razor wire elements allowing the crew to abandon ship. A capsule with 10 meters razor wire should take about 40 seconds to deploy or retract.

The razor wire is stored away by simply sliding the two halves of the capsule back together.

When closed, the razor wire presents no risk of injury.

SUSTAINABLE SECURITY SOLUTIONS

Advantages

- Direct contact vessel crew with razor wire is reduced to a minimum
- When the capsule is closed, there is no risk of crew injury
- If necessary, the razor wire barrier can be quickly retracted, which is a huge advantage on vessels, in case of abandoning vessels or other emergency situations
- When the capsule is closed, the steel guide ropes can also be easily removed if necessary

Technical Data

- | | |
|------------------------|---|
| - Weight: | Approximately 15 kg (33 lbs.) |
| - Material: | Polyethylene (PE-HD) |
| - Weight per carrier: | Approximately 17.5 kg (39 lbs.), 29 kg (64 lbs.), 35 kg (77 lbs.) |
| - Material razor wire: | Stainless steel |
| - Extended length: | Up to 10 meters (33 ft.) |
| - Diameter razor coil: | Standard NATO wire 450 mm or 900 mm available |
